Dear Sirs:

Re: Enviroshakes

We own and operate in the Province of British Columbia one of North America's finest high end lodge resorts known as Sonora Resort (www.sonoraresort.com). Sonora is a member of the Relais & Chateaux group. Trip Advisor rated us #1 in luxury resorts in Canada for 2011.

When we purchased this resort we decided that we wanted to maintain the elegance and traditional look and feel of cedar shakes while having the best fire resistant product possible. We chose your Enviroshake product to meet this need. We replaced all original cedar shakes on site with your Enviroshake product.

Your product has been easy to install, and proven very weather resistant. In January 2005, during a severe windstorm, one of our new 12,500 square foot lodge additions suffered a construction fire, equivalent to a two alarm city event. Even though our resort is on a remote island location we have a very robust fire fighting system with many fire hydrants in place. This fire suppression system combined with the fire resistant properties of Enviroshake helped contain the fire to the new construction area and two of the smaller original lodge buildings.

Our new spa and wellness centre that was roofed with Enviroshakes was within close proximity of this construction fire. Some of the environ shakes on the spa & wellness facilities suffered heat melt marks but they did not catch fire!

London Enterprises Limited dba Sonora Resort

12831 Horseshoe Place, Richmond, B.C., Canada V7A 4X5

Direct Private Line: (604) 272-7412 Fax: (604) 272-7401 Email: wpowell@londonrugs.com www.sonoraresort.com

Two of the original lodge buildings that still had cedar shakes located further away from the construction fire source caught fire unlike the roofs with Enviroshakes. We wanted to let you know that the design and safety criteria you have built into your product have proven its worth and thank you for producing such a great product.

Yours truly,

LONDON ENTERPRISES LIMITED
